MAP Reports

A window into every student's achievement and growth

With Measures of Academic Progress® (MAP®) interim assessment data and our comprehensive reporting suite, you're prepared to meet your students when and where they need you most. Use your reports to illuminate every student's learning level and serve as the basis for sound decision making.

Four features of MAP reports

1. **Timely results.** MAP assessments yield fast results that identify students who need intervention and accurately point to instructional learning objects. MAP scores each test as it is administered and, at the test's conclusion, gives preliminary results to both student and proctor. Following a test, instructors and administrators can access in-depth reports which show aggregate data by class, grade, school, and district. Most of these reports are available instantly.

2. **Context for student performance on MAP.** Because MAP scores are norm-referenced, you can compare achievement status—and changes in achievement status (growth) between test occasions—to students' performance in the same grade at a comparable stage of the school year. Our College Readiness Benchmarks Study also lets you use grade 5–9 students' MAP scores to predict future performance on ACT® achievement tests.

3. **Audience-specific reports with flexible display and grouping options.** Instructors and administrators will find a variety of MAP reports—including those that help them predict proficiency on state tests, group students for differentiated instruction, and engage students in mapping their own learning plan for the school year.

4. **Flexible reporting formats.** While most instructors and administrators make good use of the Northwest Evaluation Association™ (NWEA™) pre-configured reports, some districts and agencies want the underlying data formatted to import into their own student information or assessment management systems. NWEA provides an online interface to order, free of charge, raw data reports at any time and frequency during a testing season.

For comprehensive annotated versions of Web-Based MAP and MAP for Primary Grades (MPG) reports, please refer to the MAP Reports Reference document on the MAP Administration and Reporting Center (MARC) site.

Web-Based MAP Reports

Web-Based MAP Reports for Administrators

Web-Based MAP for Primary Grades Reports

Reports Annotation Key

1. **Norms Reference Data:** Indicates which NWEA norming study your report data draws upon. NWEA highly recommends using 2015 normative data.

2. **Growth Comparison Period:** The two terms for which you wish to receive student growth data.

3. **Weeks of Instruction:** Number of instructional weeks prior to testing, as set by your district administrator.

4. **Optional Grouping:** You may choose to disaggregate results by gender or ethnicity and, in certain cases, by special program.

5. **Small Group Display:** Summary groups of fewer than ten students will not display unless you select this option while generating your report.

6. **Mean RIT:** The group's average score for the content area in the given term.

7. **Median RIT:** The group's middle score for the content area in the given term.

8. **Standard Deviation:** The variability of scores within this group. A larger standard deviation reflects a wider range of scores.

9. **Standard Error of Measurement:** A precision estimate of an individual's achievement score. The smaller the standard error, the more precise the achievement estimate.

10. **Sampling Error:** An estimate of the amount of error in an aggregate statistic (commonly the mean) attributed to calculating the statistic on a population sample rather than the entire population. The larger the group, the lower the sampling error.

11. **Goal Performance Area:** The students' performance in the goal strands tested in this subject. Data will display either by goal strand RIT ranges or descriptors if students took a Survey with Goals test.

12. **RIT Score:** A student's overall scale score on the test.

13. **RIT Range:** A range of RIT scores defined by the student's RIT score plus and minus one standard error of measurement. If the student took the test again relatively soon, you could expect his or her score to fall within this range about 68% of the time.

14. **Percentile:** The percentage of students in the NWEA national norm sample, for this grade and subject area, that this student's score equaled or exceeded.

15. **Lexile® Range:** A score (displayed as a 150-point range) resulting from a regression analysis of the NWEA Reading RIT scale and the MetaMetrics® Lexile® scale. This range helps you identify level-appropriate reading material for individual students.

16. **Goal Area of Relative Strength (Student):** A goal area score appears in **bold** when the midpoint of the student's goal area RIT range is three or more RIT points higher than the student's overall RIT score.

17. **Goal Area of Relative Weakness (Student):** A goal area score appears in *italics* when the midpoint of the student's goal area RIT range is three or more RIT points lower than the student's overall RIT score.

18. **Overall Score:** Students' overall RIT scores for each subject appear in parentheses following their names.

19. **Goal Score:** Students' scores for each goal area within a subject appear in ten-point RIT bands.

20. **Goal Strands Tested:** Click a goal strand to access the Learning Continuum Class View for the entire class. Click a student name to access the Learning Continuum Class View for that student.

21. **The Learning Continuum Class View:** The Class View groups students by RIT score bands to show the skills and concepts they are ready to learn.

22. **The Learning Continuum Test View:** The Test View shows skills and concepts to reinforce, develop, and introduce with students based on their RIT score for each goal and sub-goal area.

23. **Learning Statements:** Skills and concepts to reinforce, develop, and introduce with students.

24. **Projected Proficiency Category:** Students are grouped in predicted proficiency categories based on NWEA linking studies that align the MAP RIT scale to state assessments.

25. **Projected RIT** or **RIT Projection:** The student's predicted score, based on national growth norms. Projections take into account the student's initial score, grade level, and time between tests.

26. **Projected Growth** or **Growth Projection:** The amount the student's RIT score is predicted to change, based on student growth norms. The student's initial score plus projected growth equals projected RIT. The *Student Growth Summary Report* shows grade-level growth projections, which are based on school growth norms.

27. **Observed Growth** or **RIT Growth:** The student's RIT point growth during the growth comparison period. On the *Student Growth Summary Report*, the second term Mean RIT minus the first term Mean RIT is the Observed Growth.

28. **Observed Growth Standard Error:** Amount of measurement error associated with term-to-term growth. If the student could be tested again over the same period with comparable tests, there would be about a 68% chance that growth would fall within a range defined by the term-to-term growth plus or minus the standard error.

29. **Growth Index:** The difference between observed and projected growth. A zero indicates the student met projection exactly. Do not use this index to compare performance between students. Use the Conditional Growth Index (see 31, below) instead.

30. **Met Projected Growth:** Indicates **Yes** if the student's term-to-term growth equaled or exceeded the growth projection or **No** if growth was less than projected. A ‡ means that the student's projected growth fell within one standard error of the student's observed growth.

31. **Conditional Growth Index:** This index allows for growth comparisons between students. It incorporates conditions that affect growth, including weeks of instruction prior to testing and students' starting RIT scores. A value of zero corresponds to mean growth, indicating growth matched projection.

32. **Conditional Growth Percentile:** The Conditional Growth Index translated into national percentile rankings for growth.

33. **Percentage of Students Who Met or Exceeded Their Projected RIT/Growth:** On the *Achievement Status and Growth Summary Report*, the percentage of students with second-term RIT scores that met or exceeded their individual growth projections. On the *Student Growth Summary Report*, the percentage of students with second-term RIT scores that met or exceeded their grade's growth projection.

34. **Percent of Projected Growth Met:** The total student growth divided by the total projected RITs, expressed as a percentage. Performance of 100% is considered average, meaning the overall student growth equaled the projections. Use in conjunction with 33, above.

35. **Growth Count:** Number of students with valid test events for both terms.

36. **Count Met Projected RIT/Growth:** On the *Achievement Status and Growth Summary Report*, the number of students with second-term RIT scores that met or exceeded their individual growth projections. On the *Student Growth Summary Report*, the number of students with second-term RIT scores that met or exceeded their grade's growth projection.

37. **Median Conditional Growth Percentile:** The middle of this student group's conditional growth percentiles.

38. **School Conditional Growth Index:** This index allows for growth comparisons between grades or schools. It incorporates conditions that affect school growth, including weeks of instruction prior to testing and starting grade-level mean RIT scores. A value of zero corresponds to mean growth, indicating growth matched projection.

39. **School Conditional Growth Percentile:** The School Conditional Growth Index translated into national percentile rankings for growth.

40. **Segmented Bar Graph:** Shows the number of students who scored within each percentage range—low, medium, and high.

	Percent of Projected Growth Met
	Count of Students with Growth Projection Available and Valid Beginning and Ending Term Scores
	Count of Students Who Met or Exceeded Their Projected RIT
	Median Conditional Growth Percentile

Annotation Key

1 Norms Reference Data: Indicates which NWEA norming study your report data draws upon. NWEA highly recommends using 2015 normative data.

2 Growth Comparison Period: The two terms for which you wish to receive student growth data.

3 Weeks of Instruction: Number of instructional weeks prior to testing, as set by your district administrator.

4 Optional Grouping: You may choose to disaggregate results by gender or ethnicity and, in certain cases, by special program.

5 Small Group Display: Summary groups of fewer than ten students will not display unless you select this option while generating your report.

13 RIT Range: A range of RIT scores defined by the student's RIT score plus and minus one standard error of measurement. If the student took the test again relatively soon, you could expect his or her score to fall within this range about 68% of the time.

14 Percentile: The percentage of students in the NWEA national norm sample, for this grade and subject area, that this student's score equaled or exceeded.

25 Projected RIT or **RIT Projection:** The student's predicted score, based on national growth norms. Projections take into account the student's initial score, grade level, and time between tests.

26 Projected Growth or **Growth Projection:** The amount the student's RIT score is predicted to change, based on student growth norms. The student's initial score plus projected growth equals projected RIT. The *Student Growth Summary Report* shows grade-level growth projections, which are based on school growth norms.

Summary for: Language Usage		
	Percentage of Students Who Met or Exceeded Their Projected RIT	81.8% (33)
	Percent of Projected Growth Met	137.5% (34)
	Count of Students with Growth Projection Available and Valid Beginning and Ending Term Scores	11
	Count of Students Who Met or Exceeded Their Projected RIT	9 (36)
	Median Conditional Growth Percentile	61 (37)

Explanatory Notes
† SE on Observed Growth is greater than normal. Use metric with caution.
* SE or SEM is greater than normal. Use metric with caution.
‡ Indicates that projected growth falls within standard error of observed growth.

Annotation Key

25 **Projected RIT** or **RIT Projection:** The student's predicted score, based on national growth norms. Projections take into account the student's initial score, grade level, and time between tests.

26 **Projected Growth** or **Growth Projection:** The amount the student's RIT score is predicted to change, based on student growth norms. The student's initial score plus projected growth equals projected RIT. The *Student Growth Summary Report* shows grade-level growth projections, which are based on school growth norms.

27 **Observed Growth** or **RIT Growth:** The student's RIT point growth during the growth comparison period. On the *Student Growth Summary Report*, the second term Mean RIT minus the first term Mean RIT is the Observed Growth.

28 **Observed Growth Standard Error:** Amount of measurement error associated with term-to-term growth. If the student could be tested again over the same period with comparable tests, there would be about a 68% chance that growth would fall within a range defined by the term-to-term growth plus or minus the standard error.

29 **Growth Index:** The difference between observed and projected growth. A zero indicates the student met projection exactly. Do not use this index to compare performance between students. Use the Conditional Growth Index (see 31, below) instead.

30 **Met Projected Growth:** Indicates **Yes** if the student's term-to-term growth equaled or exceeded the growth projection or **No** if growth was less than projected. A ‡ means that the student's projected growth fell within one standard error of the student's observed growth.

31 **Conditional Growth Index:** This index allows for growth comparisons between students. It incorporates conditions that affect growth, including weeks of instruction prior to testing and students' starting RIT scores. A value of zero corresponds to mean growth, indicating growth matched projection.

32 **Conditional Growth Percentile:** The Conditional Growth Index translated into national percentile rankings for growth.

33 **Percentage of Students Who Met or Exceeded Their Projected RIT/Growth:** On the *Achievement Status and Growth Summary Report*, the percentage of students with second-term RIT scores that met or exceeded their individual growth projections. On the *Student Growth Summary Report*, the percentage of students with second-term RIT scores that met or exceeded their grade's growth projection.

34 **Percent of Projected Growth Met:** The total student growth divided by the total projected RITs, expressed as a percentage. Performance of 100% is considered average, meaning the overall student growth equaled the projections. Use in conjunction with 33, above.

36 **Count Met Projected RIT/Growth:** On the *Achievement Status and Growth Summary Report*, the number of students with second-term RIT scores that met or exceeded their individual growth projections. On the *Student Growth Summary Report*, the number of students with second-term RIT scores that met or exceeded their grade's growth projection.

37 **Median Conditional Growth Percentile:** The middle of this student group's conditional growth percentiles.

Annotation Key

1 Norms Reference Data: Indicates which NWEA norming study your report data draws upon. NWEA highly recommends using 2015 normative data.

2 Growth Comparison Period: The two terms for which you wish to receive student growth data.

3 Weeks of Instruction: Number of instructional weeks prior to testing, as set by your district administrator.

12 RIT Score: A student's overall scale score on the test.

15 Lexile® Range: A score (displayed as a 150-point range) resulting from a regression analysis of the NWEA Reading RIT scale and the MetaMetrics® Lexile® scale. This range helps you identify level-appropriate reading material for individual students.

16 Goal Area of Relative Strength (Student): A goal area score appears in **bold** when the midpoint of the student's goal area RIT range is three or more RIT points higher than the student's overall RIT score.

17 Goal Area of Relative Weakness (Student): A goal area score appears in *italics* when the midpoint of the student's goal area RIT range is three or more RIT points lower than the student's overall RIT score.

25 Projected RIT or **RIT Projection:** The student's predicted score, based on national growth norms. Projections take into account the student's initial score, grade level, and time between tests.

Annotation Key

1 **Norms Reference Data:** Indicates which NWEA norming study your report data draws upon. NWEA highly recommends using 2015 normative data.

3 **Weeks of Instruction:** Number of instructional weeks prior to testing, as set by your district administrator.

4 **Optional Grouping:** You may choose to disaggregate results by gender or ethnicity and, in certain cases, by special program.

5 **Small Group Display:** Summary groups of fewer than ten students will not display unless you select this option while generating your report.

6 **Mean RIT:** The group's average score for the content area in the given term.

8 **Standard Deviation:** The variability of scores within this group. A larger standard deviation reflects a wider range of scores.

10 **Sampling Error:** An estimate of the amount of error in an aggregate statistic (commonly the mean) attributed to calculating the statistic on a population sample rather than the entire population. The larger the group, the lower the sampling error.

11 **Goal Performance Area:** The students' performance in the goal strands tested in this subject. Data will display either by goal strand RIT ranges or descriptors if students took a Survey with Goals test.

Annotation Key

1 **Norms Reference Data:** Indicates which NWEA norming study your report data draws upon. NWEA highly recommends using 2015 normative data.

2 **Growth Comparison Period:** The two terms for which you wish to receive student growth data.

3 **Weeks of Instruction:** Number of instructional weeks prior to testing, as set by your district administrator.

4 **Optional Grouping:** You may choose to disaggregate results by gender or ethnicity and, in certain cases, by special program.

5 **Small Group Display:** Summary groups of fewer than ten students will not display unless you select this option while generating your report.

6 **Mean RIT:** The group's average score for the content area in the given term.

26 **Projected Growth** or **Growth Projection:** The amount the student's RIT score is predicted to change, based on student growth norms. The student's initial score plus projected growth equals projected RIT. The *Student Growth Summary Report* shows grade-level growth projections, which are based on school growth norms.

27 **Observed Growth** or **RIT Growth:** The student's RIT point growth during the growth comparison period. On the *Student Growth Summary Report*, the second term Mean RIT minus the first term Mean RIT is the Observed Growth.

28 **Observed Growth Standard Error:** Amount of measurement error associated with term-to-term growth. If the student could be tested again over the same period with comparable tests, there would be about a 68% chance that growth would fall within a range defined by the term-to-term growth plus or minus the standard error.

33 **Percentage of Students Who Met or Exceeded Their Projected RIT/Growth:** On the *Achievement Status and Growth Summary Report*, the percentage of students with second-term RIT scores that met or exceeded their individual growth projections. On the *Student Growth Summary Report*, the percentage of students with second-term RIT scores that met or exceeded their grade's growth projection.

35 **Growth Count:** Number of students with valid test events for both terms.

36 **Count Met Projected RIT/Growth:** On the *Achievement Status and Growth Summary Report*, the number of students with second-term RIT scores that met or exceeded their individual growth projections. On the *Student Growth Summary Report*, the number of students with second-term RIT scores that met or exceeded their grade's growth projection.

38 **School Conditional Growth Index:** This index allows for growth comparisons between grades or schools. It incorporates conditions that affect school growth, including weeks of instruction prior to testing and starting grade-level mean RIT scores. A value of zero corresponds to mean growth, indicating growth matched projection.

39 **School Conditional Growth Percentile:** The School Conditional Growth Index translated into national percentile rankings for growth.

4 Optional Grouping: You may choose to disaggregate results by gender or ethnicity and, in certain cases, by special program.

24 Projected Proficiency Category: Students are grouped in predicted proficiency categories based on NWEA linking studies that align the MAP RIT scale to state assessments.

The MAP College Readiness Benchmarks Study lets you use grade 5–9 students' MAP scores to predict future performance on ACT® achievement tests. NWEA also periodically conducts linking studies to align the MAP RIT scale to state assessments. Visit NWEA.org to find resources for your school.

Annotation Key

(9) **Standard Error of Measurement:** A precision estimate of an individual's achievement score. The smaller the standard error, the more precise the achievement estimate.

(11) **Goal Performance Area:** The students' performance in the goal strands tested in this subject. Data will display either by goal strand RIT ranges or descriptors if students took a Survey with Goals test.

(13) **RIT Range:** A range of RIT scores defined by the student's RIT score plus and minus one standard error of measurement. If the student took the test again relatively soon, you could expect his or her score to fall within this range about 68% of the time.

(14) **Percentile:** The percentage of students in the NWEA national norm sample, for this grade and subject area, that this student's score equaled or exceeded.

(15) **Lexile® Range:** A score (displayed as a 150-point range) resulting from a regression analysis of the NWEA Reading RIT scale and the MetaMetrics® Lexile® scale. This range helps you identify level-appropriate reading material for individual students.

(16) **Goal Area of Relative Strength (Student):** A goal area score appears in **bold** when the midpoint of the student's goal area RIT range is three or more RIT points higher than the student's overall RIT score.

(17) **Goal Area of Relative Weakness (Student):** A goal area score appears in *italics* when the midpoint of the student's goal area RIT range is three or more RIT points lower than the student's overall RIT score.
